	Examiner Peter J. Bertheaud	Art Unit 3746	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In lines 1 and 2 it is stated that the "pump has a body", however the term "body" is previously used when referencing the "disk shaped body" making the new reference unclear. This is confusing and a term such as "casing" or "housing" would be more specific when referring to the "pump body".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Hani 5,215,443.

Hani discloses a high pressure liquid pump, that is provided with a coupling gear 160, a swash plate comprising: a rotating disk shaped body (3 or 103 in Fig 4) that is rotatable about a rotation axis; an annular seat provided in said disk shaped body 34

and which is inclined with respect to the rotation axis of said disk shaped body; sliding means 33 for heads of said axial pistons accommodatable in said seat; a toothed circumferential portion 30 provided monolithic with said disk shaped body that is coaxial to said rotation axis and is coupleable kinematically to the gear of said pump, the pump being functionally connected to motor means (see col.3, lines 31-38). Hani also discloses that swash plate of claim is made of plastic material (see col.3, lines 28-30). Hani further discloses that the pump has a body with a rotation pivot 166 pivoted thereon, and that the swash plate comprises a central hub 165 that is provided on said disk shaped body for coupling to the rotation pivot that is pivoted to the pump body (see Fig. 4).

Conclusion

5. The prior art made of record, noted in the attached form 892, and not relied upon is considered pertinent to applicant's disclosure.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter J. Bertheaud whose telephone number is (571) 272-3476. The examiner can normally be reached on M-F 9am - 5pm.
